PROFICIENCY LEVEL DESCRIPTIONS

DEVELOPING (150-161)
A typical student at the developing level may:
- make inferential connections between two explicitly related points
- follow the logic of an explicitly structured argument
- mistake evidence that is broadly related to a topic for evidence that is relevant to a specific assertion
- identify evidence that directly supports or undermines a claim
- have difficulty distinguishing causation from correlation

PROFICIENT (162-172)
A typical student at the proficient level has demonstrated the ability to:
- make inferential connections
- follow the logic of an argument
- understand logical relationships between assertions/arguments and supporting information
- identify implicit assumptions and evidence that supports or undermines a claim
- distinguish causation from correlation

ADVANCED (173-180)
A typical student at the advanced level has demonstrated the ability to:
- extrapolate implications
- describe the logic of complex arguments
- understand subtle logical relationships between assertions/arguments and supporting information
- identify needed evidence and implicit assumptions
- identify possible alternative causes or explanations

INSTITUTIONS’ OVERALL SCALED SCORE AND SUBSCORE MEANS

The chart below enables you to compare the mean scaled scores for your Reporting Group with the mean scaled scores of the institutions in the Comparison Group.

The number in the dark rectangle is the mean scaled score of your Reporting Group. The figure below it is a “box-and-whisker” graph of the mean scores of the institutions in the Comparison Group. The yellow bar (the “box”) shows the range of the middle 50% of the institutions. The black horizontal lines (the “whiskers”) extend to the range of the middle 80%. The vertical line through the box indicates the median – the point that separates the upper half of the institutions from the lower half. The black dot indicates the mean of the institutions’ mean scores.
